October 17, 2021

Hello ,

I am Srimanth Agastyaraju, a Master's in Data Science student at Indiana University Bloomington. I am an avid learner and curious about Machine Learning, cognitive science, and psychology in general. Swimming and graphic design are what I do during my free time.

As a current master's student, I have spent most of my time immersing myself in Data Science and Machine Learning. I am confident in my ability to perform as a Machine Learning Intern in Dropbox due to my extensive education and work experience.

My past work includes digesting the data and output the insights to a user-friendly dashboard, created using Python and SQL. I am currently enrolled in the course Applied Machine Learning, which enables me to further understand the intricacies of ML algorithms. It also enables me to write production-level code for Machine Learning. Another course, titled Elements of AI, is a challenging course, which explores the probabilistic aspects of AI including Bayesian networks and Hidden Markov models.

I think this position looks both fun and challenging — and a place for me to further my career! If you have a moment, I would love to ask you more questions about the tools you are using and the types of projects I might be running if hired. I would like to thank you for your time and consideration. I look forward to hearing more about Dropbox and the details of the Machine Learning Intern position.

Sincerely,

Srimanth Agastyaraju
