Roku

San Jose, CA, USA.

October 24, 2021

Hello ,

I am Srimanth Agastyaraju, a Master's in Data Science student at Indiana University Bloomington. I am an avid learner and curious about Machine Learning, cognitive science, and psychology in general. Swimming and graphic design are what I do during my free time.

As a current master's student, I have spent most of my time immersing myself in Data Science and Machine Learning. I am confident in my ability to perform as a Data Science Intern in Roku due to my extensive education and work experience.

I am confident in my abilities as a presenter, since when I was a technical head presenting my knowledge to a broad non-technical audience. My past work includes digesting the data and output the insights to a user-friendly dashboard, created using Python and SQL. Introduction to Statistics and Applied Machine Learning, two of the courses I am currently enrolled in, cover statistics such as regressions, distributions, A/B testing, and statistical modeling in detail.

I think this position looks both fun and challenging — and a place for me to further my career! If you have a moment, I would love to ask you more questions about the tools you are using and the types of projects I might be running if hired. I would like to thank you for your time and consideration. I look forward to hearing more about Roku and the details of the Data Science Intern position.

Sincerely,

Srimanth Agastyaraju
