Quora   September 30, 2021
Mountain View, CA

Hello ,

As a current master's student, I have spent most of my time immersing myself in Data Science and Machine Learning. I am confident in my ability to perform as a Software Engineer - Machine Learning Intern in Quora due to my extensive education and work experience.

My abilities as a Software Engineer - Machine Learning Intern are rooted in a sturdy education in mathematics. I have good, consistent scores in my undergraduate math classes. This foundation enabled me to pursue a Master's degree in Data Science.

My current coursework includes a subject titled "Applied Machine Learning." It involves being able to write production-ready code with robust pipelines. Another course titled "Elements of AI" involves advanced data structures and probabilistic models. Also, during my undergraduate studies, I have taken up a project in the field of Natural Language processing.

I think this position looks both fun and challenging — and a place for me to further my career! If you have a moment, I would love to ask you more questions about the tools you are using and the types of projects I might be running if hired. I would like to thank you for your time and consideration. I look forward to hearing more about Quora and the details of the Software Engineer - Machine Learning Intern position.

Sincerely,

Srimanth Agastyaraju
